

## **2010 TERM 4 EXTRA CURRICULAR ACTIVITIES (ECA) AND AFTER SCHOOL ENRICHMENT ACTIVITIES (ASEA)**

Dear Parents,

We are pleased to announce the Extra Curricular Activities (ECA) and After School Enrichment Activities (ASEA) for Term 4. All the activities will extend classroom learning by adding breadth to the curriculum and will help the children develop new skills and discover hidden talents.

*Please refer to the detailed description of each activity for more information!*

### **Information for parents to note:**

- ❖ Submit your ECA / ASEA form to the front office by **Monday 13<sup>th</sup> September, 2010**  
*(Late submissions cannot be guaranteed a place).*
- ❖ All Activities will commence from the **second week of Term 4, beginning 18<sup>th</sup> October and will finish Week 9 on the 2<sup>nd</sup> December.**
- ❖ Activities will run from 3:15 pm - 4:00 pm
- ❖ Activities will run for **7 lessons** in Term 4
- ❖ **We recommend every child participate in no more than 2 activities per week maximum.**
- ❖ If an ECA activity is cancelled due to unforeseen circumstances, a make-up lesson will be schedule and confirmed at a later date. There will be no make-up sessions for ASEAs.
- ❖ Please note we will do our best to accommodate the needs of everyone but some activities initially offered may be cancelled due to the lack of interest. **Please do select alternative choices.**
- ❖ **Invoices will be issued by the Finance Department at the end of Term 3. Fees for ECA activities will not be pro-rated and missed ECA sessions will not be reimbursed.**

Thursday	<b>Floor Ball</b>	Mr Perkowsky	Year 3 – Year 6

# DESCRIPTION OF ECA ACTIVITIES

**Take a Bow, Speech and Drama** – Our interactive classes will help develop confidence in speaking, communication and presentation skills and understanding body language and expressions. The key areas covered will be warm up, text work, speech and vocal, movement, creative play and improvisation, each using creativity and imagination.

**Electronics** - In this course, students will learn to question the intricacies of 'magic' electronic devices. A maximum of 10 students will work in groups of 2 and complete 7 learning modules using 'SnapCircuits'. Children will learn about electronic components such as resistors, switches, battery cells, LEDs, lamps, capacitors, solar cells, motion detectors and motors whilst having fun. All experiments will be powered by 1.5V (AA) batteries making them completely child safe.

**Karate** – Goju-Ryu Karate aims to improve physical strength and focuses on character building in students. Apart from having fun during training, children will learn discipline, techniques for self-defense and katas (a set of choreographed movements). **Sensei Thomas will conduct all lessons.**

- **Important:** Children must be at least 6 year old. Please note that the Test fee is also included in the price.

**WHIZZ KIDS Science Club** - If you are keen to find out about cool stuff, how things work, creating experiments and blowing things up then join the other mad scientists after school on Tuesdays (lab coat and big glasses optional). Fun Science is a hands-on, experimental approach to science. The program covers physics, biology, engineering, geology, chemistry and more.

If you are new to Whizz Kids then why not sign up for **Level 1!** If you were a crazy scientist in Term 2 or 3 then sign up for **Level 2 or 3** as you'll be introduced to more new and exciting experiments! ***If you would like to be a crazy scientist afterschool next term, please fill out the attached registration form!***

**Robotics** –Children will be building, controlling and filming our robots using the LEGO MINDSTORMS® NXT system. Visit [mindstorms.lego.com](http://mindstorms.lego.com) for more details. Children will learn all about the technicalities of gears, levers and electricity, all while having fun.

**Level 1 Ballet with KAVANAGH DANCE™** - Ballet is a graceful dance form that provides the basic foundation for many other kinds of dance. From the beginning, children will learn to express themselves and to tell a story in dance which helps to develop their personality. It will also improve their posture, develop poise and coordination and the refined quality and control of the body. We believe that dance is nothing if it is not enjoyed, and our prime objective is to impart the love of dancing to children, as in line with our philosophy: *Expression, Education, Encouragement and Enjoyment.*

**Multi-Media Art with Kidz Art** – If you enjoy being creative and you like to experiment with beautiful bright colours and materials, why not come along and immerse yourself in the world of colour and imagination. From Monet to Picasso, Lichtenstein to Andy Warhol, you will get to create the most exciting drawings and paintings and learn new techniques. This multimedia program engages the imagination in a new way yet all inspired by the world's most famous artists! ***For more information, check out the attached Kidz Art poster.***

# DESCRIPTION OF ASEA ACTIVITIES

**Bollywood Dancing** - Calling all students from Kindergarten to year 3! Whether you are a budding dancer or just want to learn for fun, you will be welcomed to join us at Bollywood Dance ASEA. Throughout the course you will work on technique, and be taught movements to create Bollywood magic! All students will also have the opportunity of taking part in a fantastic performance!

**Children's Chinese Dance** – Based on the popular syllabus and performance from the Beijing Dance Academy, Children's Chinese Dance will merge body exercises, Chinese music, dance and entertainment. This program will enrich the knowledge of the Chinese language and Chinese culture in a fun and active way.

**Floor Ball** - A popular style of hockey, Floor Ball is a fast paced indoor team sport. Two teams of 6 players and a goalkeeper compete to score goals using specially made sticks and a ball. If you enjoy fast, exciting team sports, why not give Floor Ball a go!
